skills

- Spanish - Native
- English - Advanced
- Customer Support
- Professional driver's license
- Git
- HTML, CSS
- Firebase
- Regular expressions

I decided to resume my career in computing to be able to constantly learn about digital technologies, and actively participate in their development.
I like to investigate and solve problems in a creative and efficient way, I learn new techniques quickly. I am an extrovert and easily establish interpersonal relationships, which is why I function well within a team. I am looking for a professional change that allows me to get out of my comfort zone and kick start my growth and my goals.
